

Erica Wang

UX & Product Designer | Frontend Developer

(347) 946-7305 | erica.w2539@gmail.com | wangerica.github.io/EricaWang | linkedin.com/in/ericaw-25

SKILLS

Design: UI/UX Design, Product Design, User Research, Usability Testing, Wireframing, Prototyping, Interaction Design, Visual Design, User Flows, Information Architecture, Brand Identity, Accessibility (WCAG)

Software: Figma, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Maya, Arnold Renderer, Fusion360, Canva

Technical: HTML, CSS, JavaScript, React, React Native, Python, C, Arduino, p5.js, Bootstrap, GitHub, Git

Languages: English (Fluent), Mandarin (Native)

PROJECTS

NomNom (Figma, InDesign, Illustrator, Photoshop)

Spring 2025

- Designed a complete brand identity system across 9 components: logo, wordmark, graphic mark, 2 typefaces, a 5-color primary palette with 10 tints, and usage guidelines, packaged into a 20-page handoff document.
- Presented the full system to peers and faculty, receiving strong feedback for clarity, visual cohesion, and creative direction.

City of Tomorrow (Maya, Arnold Renderer, Canva)

Spring 2025

- Sole designer on a full-cycle 3D project, building a futuristic urban model in Maya from initial sketches to a final Arnold-rendered video, visualizing tech-driven sustainability solutions to global challenges.
- Produced a supporting brochure in Canva combining 3D renders with written narrative, delivering a complete, presentation-ready package.

WanderScape (Figma, UX Research)

Fall 2024

- Conducted UX research across 2 rounds of interviews with 8 participants and competitive analysis, identifying a key gap: most travel apps push tourist hotspots over where locals actually go.
- Designed a 31-screen high-fidelity Figma prototype with a custom component library, progressing from wireframes through low-fidelity to a polished local-first travel discovery experience.

Recipe Log App (React, React Native, Git)

Fall 2024

- Designed and built a cross-platform mobile app for iOS and Android solo, with recipe creation, difficulty levels, ingredient tracking, pinning, and search functionality.
- Constructed a responsive, component-based UI and managed the full codebase through Git from development to deployment.

SmartBrella (Fusion360, Python, Arduino, Figma)

Spring 2022

- Co-led a 4-person team to design, prototype, and pitch a voice-activated smart umbrella, owning the full product scope from CAD modeling in Fusion360 to planning and delivery.
- Built the Python/Arduino voice-command control system and designed the Bluetooth-connected companion app in Figma, bridging hardware and digital experience end to end.

WORK EXPERIENCE

Center for Educational Innovation | Robotics and Coding Instructor

May 2022 – Present

- Instructed 300+ students (grades 1–8) in Python, Scratch, Java, and block-based programming across 10+ low-income public and charter schools, translating complex concepts into clear, interactive lessons.
- Designed and refined a hands-on robotics curriculum using Sphero and UKIT kits, continuously improving lesson structure each cycle based on student performance and engagement.

Immigration Social Services Inc. | Lead Tutor

Oct 2021 – May 2022

- Taught classes of 20+ students, designing visual learning aids and interactive activities that balanced hands-on practice with demonstrations to engage diverse learning styles.

Private Tutor

Dec 2018 – Dec 2020

- Raised student grades by an average of 30% by customizing 27 Mandarin lesson plans built around how each student actually learns, boosting fluency and comprehension.

EDUCATION

New York University | Tandon School of Engineering

May 2025

B.S. Technology, Culture, and Society | Integrated Design and Media

Coursework: Software Programming, Data Structures, Mobile App Development, UX Design, Interaction Design, Human-Computer Interaction, Brand Application, Agile Development
